

Fiber Cable Pulling Eye Warranty Disclaimer

Dear Valued Customer,

You have purchased the finest quality fiber cable available. QC test results are included to document the performance rating of this cable and to guarantee that you have received this cable in optimal working condition. An optional pulling eye has been built into this cable at your request. This cable must not be subjected to a pulling force greater than 400 foot pounds to insure transmission integrity after installation.

As this cable may potentially be subjected to out of tolerance conditions during installation that are beyond the manufacturer's control, i.e. cabling channel breaks, obstructions, severe bend angles, and installation expertise,
the pulling eye option voids warranty on this cable.
