

## Liebert Nfinity® UPS Benefits/Features

| <i>Feature</i>   | <i>Higher Availability</i>   | <i>Flexibility</i>  | <i>Lowest Total Cost of Ownership</i>  |
|--|--|---|--|
| Online, double-conversion technology   | Protects and conditions against the full range power of anomalies.       | N/A   | Longer battery lifetimes and fewer battery replacements, because online technology requires fewer transfers to battery and provides zero transfer time — extending battery life and reducing stress on load equipment. |
| Fully redundant control, power, battery modules, automatic monitoring, fault isolation | Assures system operation in the event of a component malfunction.        | Easy maintenance and upgradeable with hot-swappable power, battery, and control modules.        | Reduced maintenance cost because of user-serviceability.   |
| Scalable from 4 kVA to 20 kVA  | Fully configured and tested at the factory and shipped ready to install. | The ability to add capacity as needs grow or change.  | Allows you to cost-effectively invest in added capacity as it is needed.   |
| Flame-retardant batteries shipped charged and connected                                | Reduced possibility of fire hazard.                                      | Extended battery runtime — batteries can be added to the existing UPS and are user replaceable. | Reduced installation time and costs, because UPSs are shipped with batteries connected and charged.  |
| Two-year total on-site warranty  | Assures quick service response in the event of a problem.                | System startup 24x7 is standard with each order.  | Eliminates the cost of replacement during the 2-year warranty period.  |
| Preventative maintenance contracts from Emerson Network Power                          | Ensures continuous availability.   | N/A   | Eliminates the cost of major downtime due to sudden equipment failures.  |
