

Powerware

Powerware® Maintenance Bypass Module (MBM) for Powerware 9315

Product Focus

200-500 kVA

Features

- 65 KAIC, 100% continuous current rated molded case circuit breakers, with microprocessor controlled trip units, and auxiliary contacts
- Electrical interlocking between UPS and bypass sources
- Convection cooled cabinet with swivel casters, transfer sequence label, and print pocket
- 200% rated neutral bus.
- UPS protected 120 VAC receptacle (NEMA 5-15R)

Optional features available:

- Bypass Input Breaker (BIB) for single module applications
- Dual Bypass Input Breakers (BIB1/BIB2) for parallel redundant module applications
- Kirk Key Interlocking between UPS and bypass sources
- Auto or isolation transformer optional for 480/208 and 600/208 volt applications

Environmental Specifications

Ambient Temperature	0°C to +40°C
Storage	-20°C to +70°C
Relative Humidity	5-95% non-condensing
Altitude	1500 meters (5500ft.) at 40°C ambient temperature without load derating
Audible Noise	Less than 50 dBA at 1 meter; in accordance with ISO 7779

General Specifications

Input & Output Power Cabling
Top and bottom entry typical
Top entry only for voltage conversion models
Line-up and match harnessing is available for typical configurations up to 160 kVA

Safety

UL1778 Listed

Eaton is pleased to offer the new Powerware Maintenance Bypass Module for the Powerware 9315 product line. Powerware MBM ensures simple and reliable bypass power delivery to critical loads when servicing or testing UPS equipment.

Available for reverse transfer or parallel redundant system configurations, your critical load is supported by the best available in power protection. With more than 40 years experience in designing and building high-end, innovative UPS solutions, Eaton understands the need to deliver the ultimate in power protection and value.
